- The equity market opened on a mixed note and remained volatile throughout the session. The KSE-100 Index moved within a narrow range, recording an intraday low of 121,890 and a high of 122,903, before settling at 122,225—up by 82 points. Overall trading activity remained subdued, with 181.2 million shares exchanged and a total market turnover of PKR 13.6 billion.
- The index's gain was mainly because of the few stocks like by BAHL (3.2%, 124 points), OGDC (2%, 90 points), NBP (4.6%, 81 points), MARI (0.9%, 44 points), and MEBL (0.7%, 32 points). On the volume front, CENERGY and KEL led the activity with 23.1 million and 22.3 million shares traded, respectively.
- Investor interest was largely focused on the Exploration & Production and Banking sectors, while some profit-taking was observed in Cement and Fertilizer stocks.
- Although the market made an attempt to recover, trading volumes remained thin. The MPC meeting was held today, where the central bank maintained the policy rate in line with market expectations. While short-term volatility may continue, the longer-term market outlook remains optimistic. Investors are advised to maintain focus on fundamentally strong sectors such as E&Ps, OMCs, Fertilizers, and Banks, which continue to offer attractive dividend yields and sustainable growth prospects.
